Your first project

Foundry organizes development artifacts into projects— containers for managing permissions, monitoring, costs, and more. When you create a resource, a project is also created.This "default" project has more capabilities than projects that you create later. [Learn more](#).

Get Started

Develop

Monitor

Build your own secure copilot and generative AI applications with Azure OpenAI Service

Deploy an Azure OpenAI model and start making API calls. Connect your own data, call functions, and improve workflow with Azure OpenAI language, image and speech models. You can access the service through REST APIs, Python SDK, or our web-based interface in the Foundry portal.

[Learn More](#)

Explore and deploy

Explore and deploy the generative AI models, craft unique prompts for your use cases, and fine-tune
